

## Indigent Care Done Right!

Health Professionals are invited to join the County of San Diego *Low Income Health (LIHP) Program* network by becoming a contracting health provider. This is a great opportunity to provide healthcare to the indigent population in our San Diego County.

Some of the advantages of becoming a Contracting Provider are:

- **Electronic Treatment Authorization System (eTAR)**  
Submit authorization requests electronically and view the status of your request online, rather than waiting for notification by mail.
- **Provider Online Verification (POV) Website**  
Access to the POV website to receive immediate eligibility verification.

Agreeing to become a contracting network provider with the LIHP Program does **NOT** obligate you to see a minimum number of patients each month or to accept any referral.

Join the provider network that provides services to more than 30,000 LIHP enrollees.

# LIHP
